**EXTRAORDINARY
GRANITE & WOODLANDS
DISCOVERY TRAIL
WILDFLOWER SELF DRIVE.**
Verticordia, Hyden.

The wildflowers in Australia's most pristine temperate woodlands are now waiting to be discovered. Next weekend drive an easy 3½ hours to Wave Rock, perhaps spend the night, and then drive the scenic 297 kilometre Granite and Woodlands Discovery Trail to Norseman.

• **Wave Rock:** Visit the Wave Rock Wildflower Shoppe for a copy of the Granite and Woodlands Discovery Trail map. Then head east and the bitumen road turns into an excellent fully formed gravel road and the wildflowers along the route make this a lifetime experience.

and poverty bush interspersed amongst the ancient granite outcrops that dot the region. The interpretive signage along the entire trail provides interesting information on the history, geology, flora and fauna of the area.

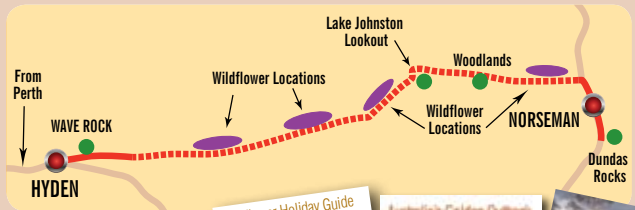

• **Norseman:** Numerous varieties of wildflowers and shrubs are now blooming through to October. At entrances leading into Norseman find wattles, cassia, mulla mulla and broom bush.

At Dundas Rocks 22 kilometres south of Norseman, see pom pom everlastings, donkey orchids, cassia, cotton bush and golden waitzia.

Visit www.waverock.com.au for further information on the area's wildflowers, attractions and accommodation options.

• **The Granite and Woodlands Discovery Trail:** Many species and shrubs are now flowering and will continue to bloom through to October. Along the trail, enjoy stunning wildflowers such as rainbow bush, broom and pink hakea, pink grevillea, orchids, emu tree, purple daisy
